**IQAC**  
Pt DDU Govt. Girls' Degree College  
Sewapuri, Varanasi, U. P.

*(accredited with B grade by NAAC)*

## About the Topic :

Information & Communication Technology (IT) is playing a crucial role in contemporary society. It has transformed the whole world into a global village with a global economy, which is increasingly dependent on the creative management and distribution of information. The same is true in case of Higher Education also. Starting from admission to examination there is intrusion of ICT in each and every activity. Technology enabled Teaching-learning & Evaluation process is also steering up. Online process of admission, admit cards and results is almost replacing the manual work. Libraries are also needed to be converted into Resource Centres rather than being merely store house of the print material. Of course this is a long journey from **Bricks to Clicks**. But the question arises whether this helps the system to get rid of the flaws and balm the deep delved agonies or even worsens the situation. Problems of poor infrastructure, paucity of trained human resource, unplanned expansions are also to be taken into consideration.

This seminar would be an attempt to discuss all these issues in a positive direction, weighing pros and cons of government policies, redefining role and responsibilities of all the stake holders, searching for newer dimensions and ultimately looking for the ways or best practices to make the most of what we have. The outcome may be of utmost importance to the students, parents, teachers, administrators, policy planners and ultimately the society itself which designates the academic institutions to take the major responsibility to shape not only the present but the future of a Nation.

## Sub-Themes :

Higher Education in India: Issues and Challenges

### Quality Check in Higher Education

Role of ICT in Higher Education  
ICT Enabled Teaching-Learning-Evaluation  
E-Content Development  
ICT & Academic Administration
